bread or bullets is the first thoroughly documented history of organized labor in nineteenth century cuba based on research in libraries and archives in cuba spain the united states and the netherlands it focuses on how urban laborers joined together in collective action during the transition from slave to free labor and in the last decades of spanish colonial rule in cuba nineteenth century cuban colonial society and the slavery system sharply divided cuba s inhabitants by race and origin this deeply affected the labor movement that started in the late 1850s as it became difficult to mobilize workers with common interests across the diverse ranks paradoxically this also drove the workers to build class ties across divisions of origin race and degrees of freedom this formed the basis for developing collective action in the 1860s the labor movement under the leadership of white creoles and spaniards called peninsulares joined the reformist movement of the creole bourgeoisie the outbreak of the ten years war in 1868 created an extremely repressive atmosphere for labor that forced thousands of cuban workers to flee to the united states after the peace treaty of el zanjón in 1878 the workers who

returned and those who had remained used their experience to rebuild the Cuban labor movement at an impressive pace. This common goal led Cuban workers to fight continuously against divisions along racial and ethnic lines and to replace their moderate unionist and strongly pro-Spanish leadership with anarchists. The end of slavery accelerated the evolution of Cuban politics and the expansion of the labor movement. Spain's shift toward reactionary colonial policies in 1890 halted this process and accentuated anticolonial sentiment among the popular classes. This helped the left wing of the separatist movement led by José Martí to launch the war of independence in 1895 with strong working class support. *Bread of Bullets* is an important work for anyone interested in understanding Cuban society, Spanish colonialism and labor relations in Latin America.

The first comprehensive study of Calderón in English, *Pedro Calderón de la Barca 1600-1681* is one of the most important dramatists. Many would say the single most important dramatist of the Spanish Golden Age, Spain's dominant and most prestigious playwright for much of the seventeenth century. His work is still regularly staged and translated, influential in more recent times on writers as diverse as Schiller, Shelley, and Lorca. The author of around 120 plays, not counting his numerous *corpus christi* autos in a variety of styles, Calderón is most famous for his stirring dramas characterized by rhetorically powerful poetry, dramatic structures carefully calibrated to produce poignant echoes, and the fizzing intellectual energy they apply to the age's ontological, eschatological, and political preoccupations. His plays succeed in combining these perennial concerns with compelling plots, subtle enough to defy definitive interpretation. As this volume seeks to show, however, Calderón's comedies deserve equal recognition, too long stereotyped as a dour, cerebral conservative. This playwright's comic works are as amusing as they are clever. This companion is the first comprehensive study of Calderón in English. It provides a rigorous but readable introduction to the man, his work, and its legacy. Its chapters, written by leading international *comedia* specialists, provide an overview of his life, explain his intellectual, social, moral, and literary contexts, and examine his stagecraft, his corpus, and his reception both within and without the Hispanic world up to the twenty-first century. Specific chapters are devoted to *La vida es sueño*, his most famous work, which appears on many a university syllabus, and to his infamous wife murder plays.

Gerald M. Phillips draws on his twenty-five year, five thousand client experience with the Pennsylvania State University Reticence Program to present a new theory of modification of inept communication behavior. That experience has convinced Phillips that communication is arbitrary and rule-bound rather than a process of inspiration. He demonstrates that communication problems can be described as errors that can be detected and classified in order to fit a remediation pattern.

regardless of the source of error the remedy is to train the individual to avoid or eliminate errors thus orderly procedure will result in competent performance inept communicators must be made aware of the obligations and constraints imposed by deep structures that require us to achieve a degree of formal order in our language without which our discourse becomes incomprehensible
